

AMENDMENTS

Please make the following amendments to the claims:

- 546 D' 1. (Amended) A method for treating cancer in a human patient, comprising:
- B¹
- a) implanting at or around the site of a tumor in the patient a first cell population containing alloactivated lymphocytes that are allogeneic to leukocytes in the patient; and
 - b) implanting at or around the site of a tumor in the patient a second cell population containing alloactivated lymphocytes that are allogeneic to leukocytes in the patient;
- wherein step a) and step b) are separated by an interval of at least three days, whereby the treatment stimulates a response in the patient against the tumor.

- 546 D' 12. (Amended) A method for treating cancer in a human patient, comprising:
- B²
- a) implanting at or around the site of a tumor in the patient a first cell population containing alloactivated lymphocytes that are allogeneic to leukocytes in the patient; and
 - b) implanting at or around the site of a tumor in the patient a second cell population containing alloactivated lymphocytes that are allogeneic to leukocytes in the patient;
- wherein step a) and step b) are separated by an interval of at least three days, and wherein the cancer is selected from the group consisting of melanoma, pancreatic cancer, liver cancer, colon cancer, prostate cancer, and breast cancer.
